Speaker Mount Installation Instructions

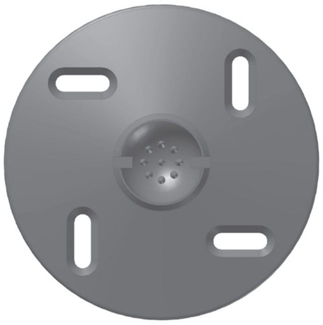

CONTENTS

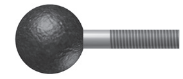

Fixing Dial x 2

Ceiling Arm x 2

Wall Plate x 2

Wall Arm x 2

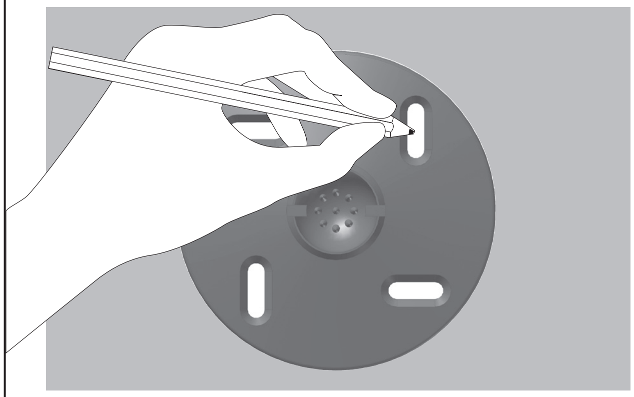

Locking Nut x 2

NOTE: No fixings are supplied.
Please use the appropriate fixings dependant on the wall structure.

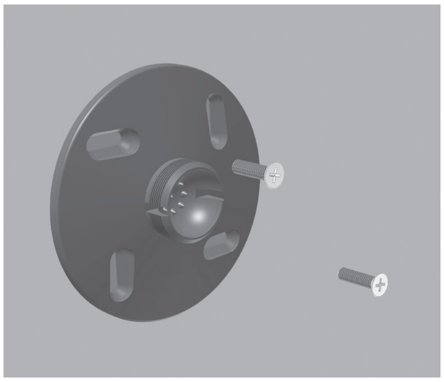

1 Mark fixing points of wall plate and drill holes.

Size will be depend on fixing method and you should refer to the appropriate manufacturers instructions.

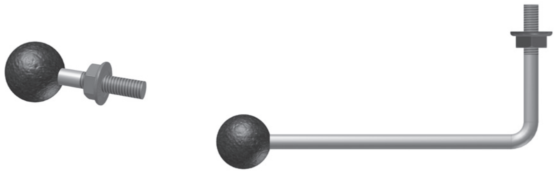

⚠ If you are unsure of being able to provide a secure fixing seek the advise of a professional installer.

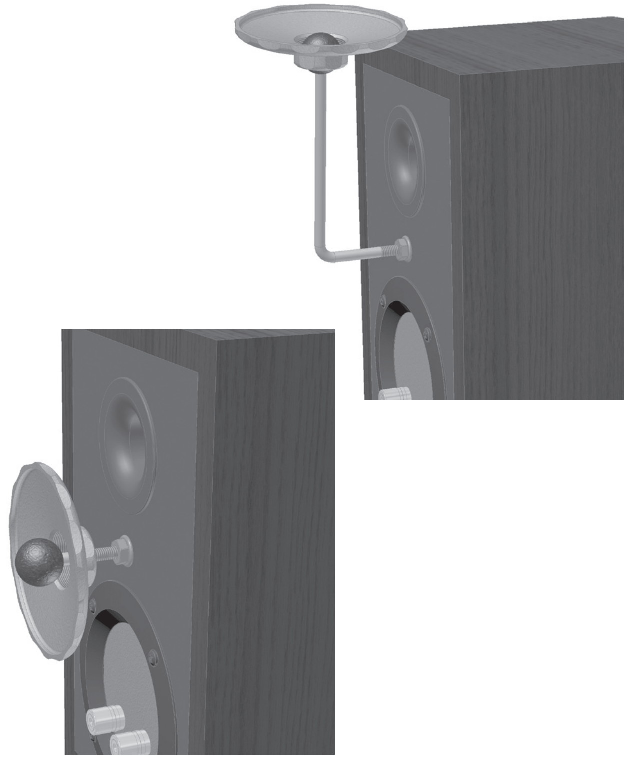

2 Fix wall plate to wall

3 Fit locking nuts onto either the wall mount or ceiling mount arms (depending on application).

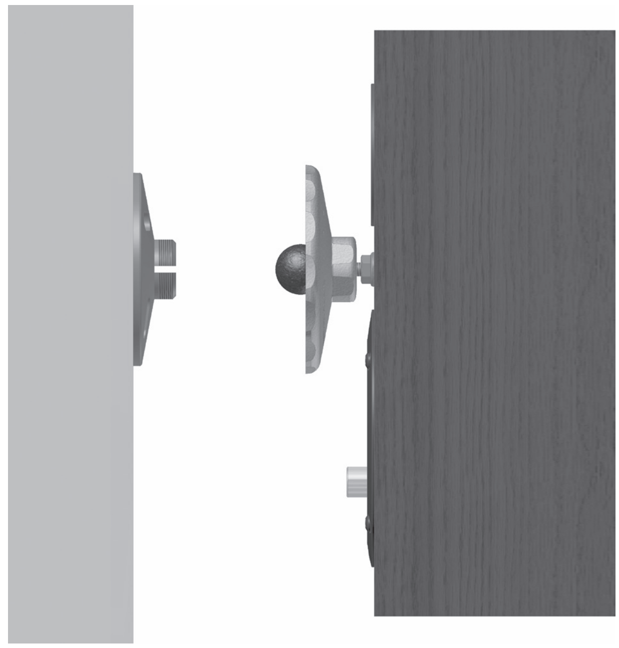

4 Slide the fixing dials over the threaded part of the arms and fix the arms to the cabinets turning them clockwise.

5 Offer the cabinet and bracket assembly up to the wall plate and start to tighten the fixing dial supporting the weight of the cabinet.

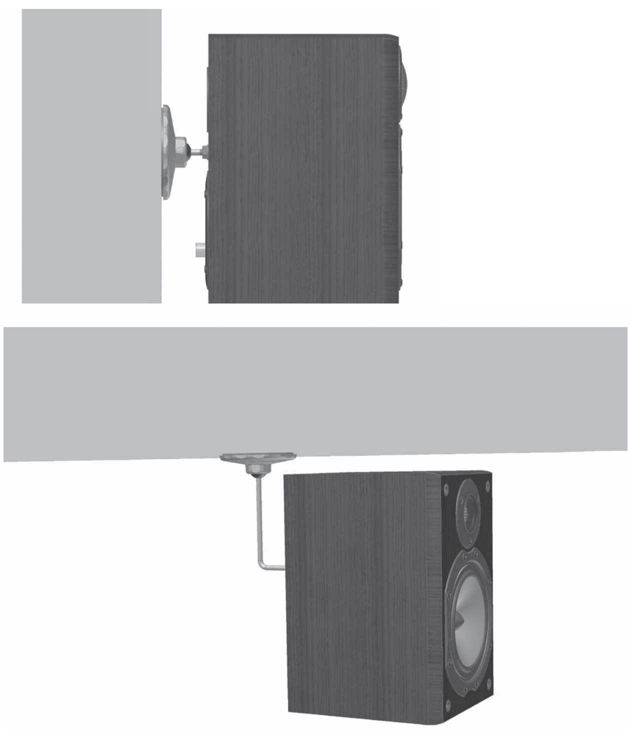

Do not completely tighten.

6 Ensure the cabinet is in the desired angle and fully tighten the Fixing Dial.

Extra purchase can be achieved by using a spanner on the Fixing Dial.

If further adjustment is required, loosen the Fixing Dial before adjusting.

This Universal Speaker Mount from Monitor Audio uses a 1/4” UNC thread and can be used with any of our speakers with the 1/4” UNC threaded insert.

The Maximum weight the bracket can hold is 4Kg.
